62.15 1895?

Maxwell's Early Blackberry.

ANNALS APR 95

RECEIVED ★ OCT 13 1920 ★ U. S. Department of Agriculture.

In introducing this new Blackberry to our friends and patrons, we do so with the utmost sincerity and belief that it is the coming early market variety, and as proof of our faith in this berry we have planted it largely in our own plantings for market.—It comes from Kansas and we can only give the originator's description of it as given to us.—It would be difficult to overestimate the value of a blackberry as *large* or *larger* than *Wilson's Early* and ripening as early as *Early Harvest,* and this is claimed for **Maxwell's Early.**—Very large, sweet, rich, luscious, melting in your mouth; no core whatever; very productive; ripens before strawberries are gone, or at same time with Lucretia Dewberry and Early Harvest Blackberry, and is three times as large as the latter. Bush a low, strong, stocky grower, free from rust, double blossom or other disease.

Fruit growers will appreciate the immense value of a blackberry, healthy, free from disease and double blossom, as large as Wilson's Early and ripening with Early Harvest—Such is Maxwell's Early, and it will be extensively planted as soon as plants can be produced.

Price, 10 cents each, $5.00 per 100, $40.00 per 1000

North Star Currants @ 25 cents each.

Thompson's Early prolific Raspberry @ $7.00 per 1000, a few 1000 left.—We had about 300,000 1 year peach in the fall, but are now about sold out except some culls 1 to 2 ft., which we offer @ $10.00. per 1000

Crosby & Champion, June Buds, 1 ft. up @ $5.00 per 100, $25.00 per 1000

Abundance & Burbank Plums, June Buds, 1 ft. up @ $6.00 per 100 $35.00 per 1000.

Apricots on Peach, 1 year @ $5.00 per 100, 3 to 5 ft.

A fine stock of Strawberry plants for spring at low prices, all the old leading and new varieties.

For fall of 1895 will have 300,000 1 year Peach, with a full assortment of other stock, and will make low prices for early orders.

ELDORADO BLACKBERRY.

DESCRIPTION.—Like many of our best fruits, Eldorado is an accidental seedling, and takes its name from the town close by which it was found in Preble Co., Ohio. It has been in cultivation 12 years and under careful test at different experiment stations for 4 years. In every case they report it high above any other variety, and all agree that it has never winter-killed or failed to produce a full crop of the finest fruit. While it is of superior flavor, and very large, the vines will also stand the winters of the far northwest without injury. The yield is enormous, the fruit being jet black, in large clusters, ripening well together. Its keeping quality is unsurpassed. Some berries brought to our office this summer were accidentally left for 10 days after picking in a covered box. Upon testing them we found them in the best condition, and as sweet as when pulled. Summing up its qualities, it is the **most productive, hardiest** (not being injured in Minnesota), **of extra-fine quality, sweetest,** without core, **best keeper**—a combination which has never before been attained in a Blackberry.

Price, $10 per 100, $75 per 1000.
